ABOUT ME

I am a Nashville native with a deep passion for technology and constant learning. Starting from a young age, I loved taking things apart and seeing how they worked. This curiosity eventually led me to code, something I had always been fascinated by but never pursued until recently. After diving into an extensive 6-month full-stack boot camp, I couldn't be happier with this career choice and look forward to using this new found knowledge in the world.

PROJECTS

Capstone Project
For my Front-End Capstone Project I built a Movie/TV Show recommendation app. Allowing users to discuss and give out recommendations to other users that they follow based on their current watch history.
- This App was built using React Js.
- Styling from CSS and Bootstrap
- API calls from JSON
- And Full CRUD fuctionality

Full-Stack Capstone Project
For my Full-Stack Capstone Project I designed and built a CookBook/Patry catalog app. Allowing users to catalog the food they have already and then be provided recipes that match the users listed ingredients.
- This App was built using C#/.net and React Js.
- Styling from CSS and Reactstrap
- API calls from C#
- And Full CRUD fuctionality

ACADEMIC HISTORY

Nashville Software School
Full-Stack software devoloper bootcamp

University of Tennessee, Knoxville
Business Economics 2014-2017

TECHNICAL EXPERIENCE

Nashville Software School

Software Developer
(November 2019 - August 2020)

Intensive full-time software development program learning full-stack technologies through the creation of applications in group and individual settings

- Working remote in an agile working enviornment
- Using HTML5, CSS3, javaScript, React.js, Reactstrap/Bootstrap, C# and .Net

GROUP PROJECTS

Nutshell Project
Nutshell is a dashboard for people to use to organize their daily tasks, events, news article, friends, and chat messages. My role in this was to make the providers that fetched information from the JSON, build out the "events" section of the app and helped with styling.
    Additional Information:
- Used React Js
- Full CRUD functionality
- CSS/Bootstrap
